Small For a Reason

Remove Growth Barriers Through:

active leadership

systems & structures

results-driven ownership

Result:

rapid value creation & favorable results

CURRENT AREAS OF FOCUS

SPECIALTY MATERIALS & PACKAGING

Specialty materials include a wide variety of nontraditional materials that can enhance performance, structural, and/or process characteristics. Specialty materials can also reduce manufacturing and operating costs through light weighting, waste reduction, parts consolidation, faster cycle times, and/or extended shelf lives.

AUTOMATION CONTROLS

Automation or automatic control is the use of various systems for operating industrial equipment, processes in factories, monitoring and controlling smart buildings and communications networks and steering and stabilization of ships, aircraft and other applications and vehicles with minimal or reduced human intervention.

PROTECTION PRODUCTS & SERVICES

Any product or service that either monitors, tracks, provides access, maintains or assures safety and provides relief or protection outside of the aerospace and defense industries are areas of interest.

SPECIALTY CONSTRUCTION SERVICES

Specialty construction services comprise establishments whose primary activity is performing specific activities involved in building and infrastructure construction or other activities but that are not responsible for the entire project.

NON-HOSPITAL HEALTHCARE SERVICES

Non-Hospital Health care services provide for the furnishing of medicine, medical or surgical treatment, nursing, hospital service, dental service, optometrical service, complementary health services, or any other medical service, as well as the furnishing to any person of any and all other services and goods for the purpose of preventing, alleviating, curing, or healing human illness, physical disability, or injury that occurs outside of a hospital setting.

HEALTHCARE PRODUCTS & DISTRIBUTION SERVICES

Healthcare products and distribution services are defined as the manufacture or distribution of either durable or disposable healthcare items that are used in patient care, which can include items from latex gloves to MRI Machines.

ENERGY SUPPLY MANAGEMENT

Energy supply management is the proactive, organized, and systematic coordination of procurement, conversion, distribution and use of energy to meet demand requirements, taking into account environmental and economic objectives.

SPECIALTY STORAGE & LOGISTICS

Storage & Logistics is the management of the flow of goods between the point of origin and the point of consumption in order to meet requirements of the customers and suppliers.
